

Philosophy

Experience

Uzun & Case Engineers is a 60 member structural engineering firm staffed by experienced professionals of the highest caliber.

Each of the five principals has extensive experience managing major projects.

Past projects include a wide variety of building sizes, types and technologies. We have an extensive portfolio of office buildings, hotels, institutional buildings, convention centers and parking garages. Having completed projects with construction costs in excess of \$400,000,000, our organization is capable of handling the full range of our clients' structural engineering needs.

Our numerous awards and citations testify to the expertise from which our clients benefit.

Imagination

Application of our technical expertise in an imaginative and responsible way is the goal on each Uzun & Case project.

We have earned a reputation for effectively balancing the structural and architectural requirements of our projects. The combination of this approach with a focus on construction costs results in integrated designs that are efficient, cost effective and sensitive to the design intent. We take pride in working as team members to keep projects within budget and on schedule.

Quality

Uzun & Case Engineers is committed to achieving the highest standards of engineering practice.

Quality is achieved through appropriate project staffing and a systematic checking program. Our organizational structure provides for principal involvement throughout the project. Each project is managed by an experienced professional who is responsible for all facets of the project. Plans and specifications are checked comprehensively prior to release.

Computer assisted structural analysis, calculations and drawing generation using the latest design & drawing software results in designs of consistent quality and minimum error.
